DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 20, 21, and 32-35, drawn to displaying and interacting with markup language documents on a dedicated purpose device, classified in class 715, subclass 760.
- II. Claims 22-27, drawn to defining and installing upgraded markup language documents onto a dedicated purpose device, classified in class 717, subclass 168.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility because no provisions are required for upgrading the claimed markup language documents. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
